

SÖNNUNGR

GINASKA

Ginaska: Viking Toothpaste

100% Natural Traditional Viking Toothpaste

100g/3.5oz Aluminum Tin

100% natural. No aluminum. No chemicals. No scent. Traditional nordic ingredients. All naturally extracted without the use of chemicals. Handmade with naturally occurring volcanic ash sediments, clay, nahcolite, and charcoal. Handmade in Helluland.

How it Works:

Ginaska in Norrønt (Old Norse) would roughly translate to "beast mouth ashes". Because we know that after a few days on patrol on in the bush, your mouth can smell like that of a beast!

Ginaska is in a powder form and looks like ashes directly out of Eyjafjallajökull! So, pretty bad ass! Also super trendy as it is very inclusive: It turns your mouth black! That blackness then annihilates everything in your mouth, leaving it super clean and odorless. Don't panic though. After you rinse your mouth, it will be back to its natural color, typically white for most Víkingar.

Directions:

Just place a little bit of powder on a (tooth) brush, maybe some water (but saliva can be enough) and it will do the trick!

Warning: This is a harsh traditional Viking product based on oral Úlfhéðnar traditions (literally). It is very different from modern toothpaste, and may therefore cause irritation and abrasions.
